Table of Contents

1 Motivation and Method 3

2 Survey Findings 6

2.1 Market Trends 6

2.1.1 RFID market development 7

2.1.2 Pricing development 8

2.1.3 Standard labels / Individual labels 9

2.1.3.1 Sales development of standard RFID labels 9

2.1.3.2 Sales development of customer-specific RFID labels 10

2.1.3.3 Significance of RFID niche applications 11

2.1.4 Project Sizes 12

2.1.4.1 Dominance of high-volume label projects 12

2.1.4.2 Development of small projects vs. large projects 13

2.2 Technical Development of RFID 14

2.2.1 Importance of RFID relative to other Auto-ID solutions 15

2.2.2 Importance of Barcode / QR-code applications 16

2.2.3 RFID vs. Barcode / QR-Code 17

2.2.4 Importance of computer vision & other active Auto-ID solutions 18

2.2.5 Importance of Chinese UHF RFID Chips 19

2.3 External Factors 20

2.3.1 Chip shortage 21

2.3.1.1 Assessment of chip shortage longitude 21

2.3.1.2 Impact of chip shortage 22

2.3.1.3 Significance of chip overstocking 23

2.3.1.4 Impact of chip shortage on other Auto-ID solutions 24

2.3.2 Impact of US – China Conflict 25

2.4 Personal Assessment 26

2.4.1 Development of companies' market share 27

2.4.2 Growth strategies of companies 28

2.4.3 Cooperation 29

2.5 Strategic Growth Opportunities 30

2.5.1 Size Matters 31

2.5.2 Segmentation 32

2.5.3 Aggregation 33

2.5.3.1 Impact of vertical integration on value creation 33

2.5.3.2 Impact of horizontal integration on value creation 34

2.6 Technical Growth Opportunities & New Added Values 35

2.6.1 Future RFID growth potentials 36

2.6.2 Importance of system integrators 37

2.6.3 Demand of value-added competencies 38

3 Summary 39
